

SEA VIEW TECHNOLOGIES IS FOCUSED ON YOUR BOTTOM LINE.

There's never been a more critical time to stay focused. To maintain control of your costs of doing business. That's why there's never been a better time to call Sea View Technologies. We can help you manage every aspect of your supply chain as intelligently and efficiently as possible, because Sea View is the industry's only true one stop supply chain and inventory management resource. We'll help you lower your costs by adding value throughout your supply chain.

At Sea View Technologies, the client relationship comes first. We're in it for the long run. Our talented and multi-faceted team of supply chain and inventory management specialists will take the time to do what's right for you and your company. What sets us apart is a unique combination of proven problem solving professionals along with an extensive physical plant. Our 64,260 square foot warehouse stocks over 80 million components, ready for immediate shipping anywhere, anytime you need them.

Purchase Excess Inventory

We will work with you, personally, to customize solutions based on your excess inventory management challenges. We take advantage of the strength and experience of our strategic account managers, internet presence and broad marketing campaigns to distribute your product worldwide.

Our 64,260 square foot warehousing facility provides ample space and 24-hour security for your excess inventory. Your timetable dictates our work. When you request it, we will quote and purchase your excess and arrange for shipping within 48 hours.

Our commodity specialists will work with you to place the proper value on your volatile items so you can decide to sell, consign, or hold.

Consignment Programs

Product is posted on Sea View's internal inventory system.

Sea View's experienced sales staff will match incoming requirements to consignment stock.

Product is picked, packaged, and shipped.

Monthly sales report and check is sent to OEM.

You can view sales activity of your consigned product through our website at www.seaviewtech.com.

Scrap Value Recapture

Sea View will purchase your precious metal bearing scrap.

Our Reclamation Department processes and sorts the board materials.

We will establish the scrap value of the precious metals.

The precious metals are re-marketed and a monthly settlement is sent to OEM.

Value-Added Services

In-house tape & reel

JIT programs

Memory testing & verification

Kitting

Dry packing & vacuum sealing

Customer returns processing

Market/value analysis

Bar code labeling

On-Site Inventory Management

Sea View will bond 2-3 years of active product in order to support your current/future requirements.

We ship product according to your schedule.

We will eliminate your costs associated with carrying the excess inventory.

Your money is freed up so you can invest in other, more profitable areas of growth.

Sale of Electronic Components

We purchase and market both leading edge and end-of-life products.

Our dedicated account managers market products globally, 24 hours a day.

Inventory is uploaded daily to several online search engines to market your product internationally.

Finished Goods

Returns Management.

De-manufacture products.

Re-sell products.

We will provide the highest return possible for your excess inventory items.

Vendor Managed Inventory

Delivers a higher service level and reduces supply chain costs.

Compresses the order cycle, reduces errors, and improves order fulfillment and inventory allocation capabilities.

Improves visibility, reliability, and flexibility of materials.

We have what you need, when you need it. Call Toll Free 877-725-3468.
